URBIS from 5 to 7

The URBIS 5 & 7 series attachment supplied by TECNOINDUSTRIE MERLO SpA comprises simple rear-loading tanks with tip-up discharge using a specific double-acting cylinder with a single stem. Manual tank loading by operators is facilitated by or tip-up side tailgates on the bodies with stainless steel hinge. .

The central rear part of the attachment houses the bin pick-up, lifting and emptying system (optional) with a possible load-assist device.

Tipping kinematics and tank configuration ensure the possibility of performing coupling manoeuvres inside the rear compactors fitted with a universal loading aperture.

CHARACTERISTICS AND EQUIPMENT	URBIS 5	URBIS 6	URBIS 7
Dump body volume (m3)	5	6	7
Total mass on ground (kg)	3,500	3500 - 5000	from 3500 to 7500
Discharge system	By means of dump body tip-up		
Unloading into larger compactors	●	●	●
